Major shareholders – October 2008

Merafe's share price performance relative to Mining Index

Data: Datastream

Xstrata-Merafe, the world's largest ferrochrome producer

Operations overview

SMELTERS	CAPACITY
Wonderkop	520 kt FeCr - 6 furnaces (Conventional)
Rustenburg	440 kt FeCr - 6 furnaces (Conventional)
Boshoek	240 kt FeCr – 2 furnaces (Outokumpu)
Lydenburg	400 kt FeCr - 4 furnaces (Premus)
Lion	360 kt FeCr - 2 furnaces (Premus)
Total 5 production sites	<ul style="list-style-type: none"> • 1 960 kt in production capacity • 20 furnaces • 7 mines

Barriers to entry

Low barriers to entry, a thing of the past:

- Capital cost of building smelters have gone up over 500%
- Lead time for critical items needed for construction now 3 years
- Power supply - when will power be available for new projects?
- Shortage of available quality ore reserves
- Serious shortage of artisans and skilled labour (until 2010)
- Escalating production costs

What Merafe said in Q2 and Q3 2008

- Slow down in global stainless steel production due to:
 - traditional northern hemisphere summer shutdowns
 - stockists/buyers expecting nickel prices to come down resulting in destocking
- Specific to China (in addition to the above) were stainless steel cut backs due to:
 - earthquakes, floods and power issues
 - closures around the Olympic games
- Expected recovery in fourth quarter of 2008

What happened in Q4 2008?

- Nickel prices continue to fall (\$12,000/t)
- Global economic collapse of financial markets
- Chrome ore trade has dried up
- Surplus stocks of ferrochrome and chrome ore at plants, SA ports and Chinese ports
- Marginal producers dumping ferrochrome in spot market
- Marginal producers closing or switching to other ferro alloys
- Swift response from most major ferrochrome producers (announcements of at least 40% production cut backs)

Xstrata-Merafe production cut backs

- Temporary suspension of six furnaces
- 500,000/t of annual planned ferrochrome production
- Three furnaces at Rustenburg
- Two furnaces at Lydenburg
- One furnace at Wonderkop
- 80,000/t reduction in ferrochrome production for 2008
- Furnaces will be switched back on dependent on market conditions

Major ferrochrome production cut backs (kt)

		<u>2008</u>
Projected production		8,152

Shipping costs reflecting the slow down of global economic activity

The Baltic Exchange Dry Index

Data: Datastream & Macquarie Research, November 2008

Currency gains or losses against US\$

Data: Datastream – 12 November 2008

Decline in the ZAR

The decline in the Rand especially against the US\$ can be attributed to the following:

- Current account deficit currently at -7.3% of GDP
- Weakening of commodity prices
- Double digit inflation – predicted to be at 11.9% by end of 2008
- GDP growth expected to be down from 5.1% in 2007 to 3.9% in 2008 and down to 2.6% in 2009
- Capital outflows from emerging markets – about R80 billion out of South Africa so far in 2008
- Recent downgrading of South Africa by the rating agencies from BBB+stable to BBB+negative

Prospects

- Historically destocking process has taken six to nine months
- This time ferrochrome producers have reacted very swiftly
- This time stainless steel producers are not carrying a lot of stainless steel inventory
- When the market turns it will turn quickly
- Ferrochrome prices and sales volumes expected to come under pressure in the short-term, but recover based on medium- term fundamentals
- Chinese government financial assistance plan (“stimulus package”) recently announced
 - 200bn yuan : Highways
 - 180bn yuan : Railways
 - 175bn yuan : Property
 - 85bn yuan : Power grid
 - 80bn yuan : Roads
 - 280bn yuan : Non-material consuming areas such as: Vat reform, culture, education, science and healthcare
- Strong focus on ferritic stainless steel production to continue
- China remains the growth point

Appendices

Merafe Coal

- Vehicle to pursue coal opportunities in South Africa
- 50/50 joint venture between Merafe and Sentula Mining Limited
- Prospecting of Schoongezicht and Bankfontein coal deposits is underway
- These properties have a total target coal resources of approximately 10m tonnes
- Both projects are opencast and well positioned to supply export quality and Eskom quality coal
- Merafe Coal should be in a position to commence mining during the second half of 2009

Average power rates in 2008
