CEO Commentary on results

Despite a challenging operational environment, Merafe produced a pleasing set of financial results for the 2018 financial year. The uncertainty created by geopolitical events such as Brexit and trade wars resulted in lower realised CIF ferrochrome prices. Profit after tax decreased by 25% mainly as a result of lower ferrochrome sales volumes, lower average net CIF ferrochrome price and a marginally stronger average Rand:US$ exchange rate. A total dividend of R351 million has been released to shareholders for the year.

Commentary

Financial review

The results for the year ended 31 December 2018 have been prepared in accordance with International Financial Reporting Standards (IFRS).

Rounding of figures may result in minor computational discrepancies of the tabulations.

Merafe's revenue and operating income is primarily generated from the Glencore-Merafe Chrome Venture (Venture) which is one of the global market leaders in ferrochrome production, with a total installed capacity of 2.3 million tonnes of ferrochrome per annum. Merafe shares in 20.5% of the earnings before interest, taxation, depreciation and amortisation (EBITDA) from the Venture. Merafe has one reportable segment being the mining and beneficiation of chrome ore into ferrochrome and as a result no segment report has been presented.

Merafe's share of revenue from the Venture decreased by 5% from the prior year to R5 606 million (2017: R5 889 million). Ferrochrome revenue decreased by 6% year on year to R4 849 million (2017: R5 163 million) primarily as a result of a 7% decrease in net CIF prices and a 1% decrease in ferrochrome sales volumes to 372kt (2017: 375kt).

Chrome ore revenue increased by 3% year on year to R747 million (2017: R726 million), driven by a 16% average sales price increase. This was partially offset by a 23% decrease in sales volumes to 248kt (2017: 322kt).

Merafe's portion of the Venture's EBITDA for the year ended 31 December 2018 is R1 409.4 million (2017: R1 705.5 million). The EBITDA includes Merafe's attributable share of standing charges of R131.5 million (2017: R117.5 million) and a foreign exchange gain of R141.5 million (2017: foreign exchange loss R73.4 million).

After accounting for corporate costs of R44.4 million (2017: R40.4 million), which include a cash settled share-based payment expense of R3.1 million (2017: R5.6 million), Merafe's EBITDA reached R1 345.9 million (2017: R1 665.2 million). Corporate costs include Corporate Social Investment expenses of R3.3 million (2017: R3.5 million) following contributions to the Adopt-a-School Project. This project primarily relates to the Company's intervention in the development and upgrade of infrastructure as well as social and academic skills of two schools within the areas we operate in.

Profit for the year ended 31 December 2018 amounted to R683.4 million (2017: R914.1 million), after taking into account depreciation of R405.5 million (2017: R368.2 million), net financing income of R4.0 million (2017: net financing expense R19.3 million) and taxation expense of R260.86 million (2017: R363.65 million). The taxation expense includes deferred tax credit of R29.6 million (2017: R47.4 million) which arose primarily as a result of temporary differences on property, plant and equipment as well as those relating to provisions and accruals. There is no unredeemed capital expenditure balance at 31 December 2018 given that taxable profits exceeded capital expenditure.

Depreciation increased year on year primarily as a result of capital expenditure for the year as well as a review of assets at year end that resulted in accelerated depreciation at our smelters. The assets review included a reassessment of the useful lives of permanent structures and furnaces. This led to accelerated depreciation of R38 million (2017: R30 million) on affected assets.

Sustaining capital expenditure increased by 2% to R412.0 million (2017: R403.0 million). This is necessary stay-in-business spending coupled with the Venture's ongoing efforts to improve safety, costs and efficiencies across all operations.

The R200 million unsecured, three-year revolving credit facility with ABSA remained unutilised for the year.

At 31 December 2018, Merafe had cash and cash equivalents of R280.6 million (2017: R671.7 million) which comprised of cash held by Merafe of R235.8 million (2017: R464.0 million) and R45.0 million (2017: R207.7 million) being Merafe's share of the cash balance in the Venture.

Trade and other receivables increased by 10% compared to the previous year primarily as a result of the weaker closing Rand:US$ exchange rate. The Rand:US$ exchange rate closed at R14.4 (2017: R12.4) as at 31 December 2018.

The increase in inventories is a function of higher raw materials and finished goods. The increase in raw materials is mainly due to higher chrome ore stock levels at a higher average cost as well as an increase in the reductant cost per tonne. The increase in finished goods is a function of higher production volumes compared to sales volumes as well as higher production costs. Finished goods volumes on hand at year end represent approximately four to five months of sales.

The Board declared a final dividend of R151 million (2017: R226 million), which is 6 cents per share (2017: 9 cents per share). This amounts to a full year dividend of R351 million (14 cents per share) compared to R301 million (12 cents per share) for the previous financial year.

Safety

Safety remains the most important priority for the Venture. Our total recordable injury frequency rate (TRIFR) reduced by 10% to 3.39 from 3.74 at the end of 2017. We were saddened by the fatality at our Thorncliffe mine in August 2018. Due to a fall of ground incident, Mr Ntandazo Dlela (47), a team leader who worked for one of our mining contractors, was fatally wounded. In the same incident, his colleague Mr Mzubanzi Nkomo, was injured but has since fully recovered.

The safety of all our employees remains a critical focus area and all efforts continue to be made to ensure that the highest standards of safety remain in place at all the Venture's operations. Continued focus on our catastrophic hazards and assurance verification of critical controls continue into 2019.

Operational Review

Merafe's attributable ferrochrome production from the Venture for the year ended 31 December 2018 increased to a new record high of 407kt (2017: 395kt) which is equivalent to installed capacity utilisation of 85%.

A number of annual production records were once again achieved during 2018 including ferrochrome production at the Lion smelter and the Wonderkop smelter as well as an annual pellet production record at the Bokamoso sintering plant at the Wonderkop smelter.

Total production cost per tonne of ferrochrome increased by 9% despite inflationary pressures. This was achieved as a result of:

- time in use management during the high electricity tariff winter months;
- increased production that diluted overheads;
- electricity tariff increases of only 5.2% effective 1 April 2018; and
- ongoing operational cost control initiatives.

The electricity situation in the country is concerning given the financial, structural and operational challenges that face Eskom. Eskom's situation exposes the Venture, and indeed the entire country, to both tariff and electricity supply risks. The Venture continues to monitor the situation through involvement in various committees between the industry and Eskom. Additionally, the Venture continues to explore energy efficient means of producing our products. These various initiatives have contributed to the Venture remaining the lowest cost ferrochrome producer in South Africa.

The Venture has been able to conclude three-year agreements with our unions at all our operations except the eastern mines. This brings about welcome certainty for the business as well as for our employees.

Market Review

In 2018, global stainless steel production is estimated to have increased by 6.1%^ year on year, on par with 2017's increased production, despite increasing macroeconomic uncertainty in key producing regions.

Asia continued to be the major source of increase in production. Indonesian production reached 2.3 million^ tons in 2018 and was the primary driver of global growth, largely as a result of stainless steel projects commissioned during 2017, recording their first full year of production. India's year on year production growth rate is estimated to have reached 9.2%^ in 2018, a significant increase from the growth rate seen in 2017. Total annual production in China is estimated to have reached 26.6 million^ tons in 2018, with all time high production having occurred during Q4. China's full year melt accounted for an estimated 51.7%^ of global output.

Production in the rest of the world mostly held firm year on year. Total US production is estimated to have increased by 1.3%^ from 2017, while Europe's production is estimated to have remained largely flat year on year.

Growth in stainless steel melt rates translated into healthy demand for ferrochrome throughout most of the year. During Q1 and Q2 of 2018, power supply issues coupled with environmental inspections intermittently disrupted Chinese ferrochrome production, particularly in Inner Mongolia. During these periods, China's role as swing producer of ferrochrome was reinforced, as spot prices increased due to lower availability of domestically produced Chinese ferrochrome.

Global ferrochrome production in 2018 is estimated to have reached 13.4 million^ tons, matching the stainless steel growth rate of 6.1%^ year on year. China's domestic production is estimated to have increased by 8.5%^ year on year, exceeding South Africa's growth of 5.3%^.

As a result of ferrochrome production growth in China, demand for South African chrome ore increased further in 2018. According to official customs statistics, China imported a total of 14.3 million* tons of chrome ore during the year, 3.1%* more than in 2017. The share of imported South African ore increased to 76.1%*, up from 72.3%* a year earlier, realising a 8.5%* growth rate year on year.

Outlook

Global GDP and stainless steel production are both forecast to grow in 2019 with Indonesia's contribution to the stainless steel industry continuing to become more meaningful. This will underpin projected growth in demand for ferrochrome. The Venture's past and continued investment in the efficiency of its operations enables it to take advantage of expansion in the market. Locally, Eskom remains a key risk factor for the Venture in 2019.

In accordance with our strategy, we remain committed to maximising return to our shareholders in the near term in the form of dividends and will continue to assess opportunities to deliver shareholder value.

OUR BUSINESS MODEL AND STRATEGY

Ferrochrome

The aim of our business model and strategy is to ensure that our ferrochrome interests are profitable and sustainable and that they add value to all our stakeholders. We achieve this by:

- extracting chrome ore from the Venture's mines and beneficiating it in our smelters in a safe and cost-efficient manner;
- investing in projects such as the Bokamoso and Tswelopele pelletising and sintering plants and the Lion ferrochrome plant Phases I and II that improve the energy and cost efficiency of the Venture's ferrochrome operations;
- employing the Venture's proprietary Premus technology to ensure that it is the lowest-cost producer of ferrochrome in South Africa and, despite rising energy costs in South Africa, remains in the lowest quartile of the global ferrochrome production cost curve;
- using the flexibility provided by the Venture's variety of technologies to meet changing operating circumstances and customer requirements; and
- focusing on reducing costs at the operations and head office.

The Company may also consider acquisitions outside of ferrochrome on an opportunistic basis.

Notes to the summarised consolidated financial statements

1. Basis of preparation

On 8 March 2019, the Board of directors (the Board) of Merafe Resources Limited (the Company) approved the audited consolidated annual financial statements of the Merafe Group (Group) and the Company for the year ended 31 December 2018.

These summarised consolidated financial statements have been prepared under the supervision of Ditabe Chocho CA(SA) (Financial Director), in accordance with the framework concepts, the measurement and recognition requirements of International Financial Reporting Standards (IFRS), the requirements of the Companies Act 71 of 2008, as amended, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee, the Financial Pronouncements as issued by Financial Reporting Standards Council and as a minimum contain the information required by IAS 34 Interim Financial Reporting.

The Board takes full responsibility for the preparation of the summarised consolidated financial statements, which are unaudited and unreviewed. The financial information has been extracted from the underlying audited consolidated annual financial statements.

The accounting policies applied in the preparation of the audited consolidated annual financial statements from which the summarised consolidated financial statements were derived are in terms of IFRS and are consistent with those accounting policies applied in the preparation of the previous years audited consolidated annual financial statements.

The consolidated annual financial statements from which the summarised consolidated financial statements were derived have been audited by the Group's auditors, Deloitte & Touche. Their unmodified audit report and the audited consolidated annual financial statements are available for inspection at Merafe's registered office and on our website (http://www.meraferesources.co.za/stake-annual-results.php).

1.1 Accounting policies

The accounting policies applied in the preparation of these results are in terms of IFRS and are consistent with those applied in the previous consolidated annual financial statements, except for the adoption of various revised and/or new standards. For the impact of adoption of new standards, refer to note 1 of the accounting policies disclosures in the annual financial statements. The Group did not early adopt any new, revised or amended accounting standards or interpretations.

1.2 Critical accounting judgements and key sources of estimation uncertainty

The preparation of the summarised consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates are reviewed on an ongoing basis. Underlying assumptions are also reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised.

In particular, information about significant areas of estimation, uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the summarised consolidated financial statements are as follows:

- Measurement of depreciation and impairment, useful lives and residual values of property, plant and equipment
- Inputs used in the determination of the fair value of the share-based payment transactions
- Lease classification between operating and finance lease and depreciation of finance lease assets
- Assumptions used in calculation of the life of the mines/smelters, estimation of the closure and restoration costs and inputs used in the calculation of the present value of the provision for closure and restoration costs
- Recognition of deferred tax asset and projection of future taxable income to recover the deferred tax asset
- Consolidation: control assessment
- Fair value measurement of embedded derivative

These disclosures are included in the audited consolidated annual financial statements.

2. Determination of fair values

A number of the accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities.

Fair values have been determined for measurement and/or disclosure purposes based on the methods as indicated below.

2.1 Embedded derivatives

The embedded derivative is included in trade and other payables at fair value. The fair value of the embedded derivative is based on the latest available ferrochrome prices and closing foreign exchange rate. The embedded derivative at 31 December 2018 was R48.7 million liability (2017: R35.2 million asset) and is based on level 2 hierarchy per IFRS 13. The valuation is based on observable market inputs of prices and exchange rates.

2.2 Share-based payment transactions

The fair value of employee share options and share grants is measured using the Black-Scholes Merton model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility adjusted for changes expected due to publicly available information), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on Government bonds).

3. Prior period error

The Group has restated its previously reported financial statements as at 31 December 2017 and updated the relevant disclosures. In the prior year, the working capital loan was initially incorrectly disclosed under trade receivables and other receivables. The loan was subsequently correctly disclosed as a liability. However, the correction was erroneously disclosed as a reclassification instead of a prior period error. The impact of the restatement was an increase in current assets and an increase in current liabilities by an amount of R72.2 million.

6. Related parties

Related party transactions and balances

During the current financial year, management performed a re-assessment of its Related Party relationships in accordance with IAS 24, Related Party Disclosures. The Glencore Plc Group is a related party taking into consideration the shareholding and related significant influence coupled with the substance of the relationship. Significant transactions and balances with all entities within the Glencore Plc Group are therefore disclosed together with the comparative figures.

All related party transactions were concluded on an arms-length basis and relate to Merafe's attributable 20.5% interest in the Venture. There are no outstanding commitments at year end.

2. Ordinary Resolution Number 2: Re-appointment of retiring directors

"Resolved that, by separate ordinary resolutions numbered 2.1 and 2.2, the following directors, who, in terms of the MOI, retire by rotation at this Annual General Meeting, and, being eligible, stand and offer themselves for re-election, be and are hereby re-elected:

2.1 Mr Abiel Mngomezulu
2.2 Ms Belese Majova

Notes to Ordinary Resolution Number 2

- Resolutions numbered 2.1 and 2.2 (inclusive) above are proposed by separate vote and the re-appointments which they represent constitute separate and divisible ordinary resolutions and will be considered to have received the support of the Nomination Committee.
- The reason for resolutions numbered 2.1 and 2.2 (inclusive) is that in terms of the provisions of the MOI, one-third of the non-executive directors, or if their number is not a multiple of three, then the number nearest to, but not less than one-third, are required to retire at each Annual General Meeting and, being eligible, may offer themselves for re-election.
- The Board of Directors of the Company (Board) has evaluated the performance and contribution of each director standing for re-election and has recommended the re-election of each of the directors.
- Mr Chris Molefe (Board Chairperson) retires at this AGM and has not offered himself for re-election.
- Abridged *curricula vitae* of each of the directors of the Company standing for re-election are set out on pages 42 and 43 of the Merafe Resources Integrated Annual Report 2018 and on page 16 of this Notice.

3. Ordinary Resolution Number 3: Confirmation of appointment of directors

Notes to Ordinary Resolution Number 3

The reason for this resolution is that in terms of the Company's MOI, shareholders are required to confirm an appointment made by the Board in order for that appointment to become permanent.

Abridged *curricula vitae* of these directors are set out on pages 42 and 43 of the Merafe Resources Integrated Annual Report 2018 and on page 16 of this Notice.

4. Ordinary Resolution Number 4: Appointment of members to the Audit and Risk Committee for the forthcoming financial year

"Resolved that the following members, by separate ordinary resolutions numbered 4.1 to 4.3 (inclusive), being eligible and offering themselves for re-election, be and are hereby appointed as members of the Audit and Risk Committee for the financial year ending 31 December 2019:

4.1 Ms Matsotso Vuso (subject to the passing of Ordinary Resolution Number 3.1)

4.2 Ms Grathel Motau (subject to the passing of Ordinary Resolution Number 3.3)

4.3 Ms Belese Majova (subject to the passing of Ordinary Resolution Number 2.2)

Notes to Ordinary Resolution Number 4

- Resolutions numbered 4.1 to 4.3 (inclusive) above constitute separate and divisible ordinary resolutions and will be considered by separate vote.
- The reason for resolutions numbered 4.1 to 4.3 (inclusive) is that in terms of the provisions of section 94(2) of the Companies Act, a company shall at every Annual General Meeting elect an audit committee comprising at least three members.
- The Nomination Committee conducted an assessment of the performance and independence of each of the directors proposed to be members of the Audit and Risk Committee and the Board considered and accepted the findings of the Nomination Committee. The Board is also satisfied that the proposed members meet the provisions of section 94(4) of the Companies Act, that they are independent according to King IV (Principle 7; sub-practice 28) and that they possess the required qualifications and experience as prescribed in Regulation 42 of the Companies Regulations, 2011 and therefore recommends their nomination.
- Abridged *curricula vitae* of each of the independent non-executive directors proposed to be appointed to the Audit and Risk Committee appear on pages 42 and 43 of the Merafe Resources Integrated Annual Report 2018 and on page 16 of this Notice.

5. Ordinary Resolution Number 5: Re-appointment of external auditors of the Company

"Resolved that the re-appointment of Deloitte & Touche Inc. as the external registered auditors of the Company, and being independent from the Company, be and is hereby approved and Patrick Ndlovu (IRBA no. 782688) be and is hereby appointed as the designated audit partner for the financial year ending 31 December 2019."

Notes to Ordinary Resolution Number 5

- The reason for this resolution is that in terms of section 90(1) of the Companies Act a company is required to appoint an auditor at every Annual General Meeting.
- The duty to nominate auditors for appointment lies with the Audit and Risk Committee.
- The Audit and Risk Committee conducted an assessment of the performance and independence of the external auditors and considered whether or not the external auditors comply with the provisions of the Companies Act and section 22 of the Listings Requirements, and the Board considered and accepted the findings. The Board is satisfied that the proposed external auditors and Mr Patrick Ndlovu comply with the relevant provisions of the Companies Act and the Listings Requirements.

6. Ordinary Resolution Number 6: Authority to sign all documents required to give effect to all resolutions in this Notice

"Resolved that any one of the directors of the Company or Company Secretary be and is hereby authorised to do all such things and sign all such documents and procure the doing of all such things and the signature for all such documents as may be necessary or incidental to give effect to all ordinary and special resolutions passed at the Annual General Meeting."

Section B: Ordinary Resolutions of a non-binding nature

7. Non-binding Advisory vote – Remuneration Policy and Implementation Report

For ordinary resolutions numbered 7.1 and 7.2 to be duly adopted, the support of more than 50% (fifty percent) of the voting rights exercised on each ordinary resolution by shareholders present or represented by proxy at the Annual General Meeting and entitled to exercise voting rights on the relevant resolution, must be exercised in favour of such resolution.

Notes to Ordinary Resolution Numbers 7.1 and 7.2:

- The Listings Requirements require and Principle 14 and sub-practice 37 of King IV recommends companies to table their remuneration policy and implementation report every year to shareholders for a non-binding advisory vote at the Company's Annual General Meeting. This vote enables shareholders to express their views on the remuneration policies adopted and on their implementation.
- These resolutions are of an advisory nature only and failure to pass these resolutions will therefore not have any legal consequences relating to existing arrangements. However, the Board will take the outcome of the vote into consideration when considering the Company's Remuneration Policy.
- Shareholders are reminded that in terms of the Listings Requirements and King IV, should 25% (twenty-five percent) or more of the votes cast be against one or both of these non-binding ordinary resolutions, the Company undertakes to engage with shareholders as to the reasons therefore and undertakes to make recommendations based on the feedback received.

Notes to Special Resolution Number 2

In terms of section 45 of the Companies Act, a company is required to obtain shareholder approval, by way of passing a special resolution for the provision by it of direct or indirect financial assistance to a related or inter-related company or corporation, or any person related to any such company or corporation.

The Company has at all relevant times and prior to the effective date of the new Companies Act being 1 May 2011, provided financial assistance to its subsidiaries and related and inter-related companies. To facilitate the achievement by the Group of its strategic goals, it is necessary that this assistance continues. The main purpose for this authority is therefore to grant the Board the authority to authorise the Company to provide inter-group loans and other financial assistance for purposes of funding the activities of the Group. However, in accordance with the provisions of section 45 of the Companies Act, the Board undertakes that it will not adopt a resolution to authorise such financial assistance, unless the Board is satisfied that:

- immediately after providing any direct or indirect financial assistance approved in terms of this resolution, the Company would satisfy the solvency and liquidity test as contemplated in section 45(3)(b) of the Companies Act;
- the terms under which the financial assistance is proposed to be given are or will be fair and reasonable to the Company; and
- written notice of any such resolution by the Board shall be given to all shareholders of the Company and any trade union representing its employees:
  - within 10 business days after the Board adopted the resolution, if the total value of the financial assistance contemplated in that resolution, together with any previous such resolution during the financial year, exceeds 0.1% (zero point one percent) of the Company's net worth at the time of the resolution; or
  - within 30 business days after the end of the financial year, in any other case.

- any such repurchase of ordinary shares is effected through the order book operated by the JSE trading system and done without any prior understanding or arrangement between the Company and the counterparty (reported trades are prohibited);
- authorised by the MOI;
- the general authority shall be valid until the next Annual General Meeting of the Company, provided that it shall not extend beyond 15 months from the date of this Special Resolution Number 3;
- when the Company has cumulatively repurchased 3% (three percent) of the number of ordinary shares in issue on the date of passing of Special Resolution Number 3, and for each 3% (three percent) thereof, in aggregate acquired thereafter, an announcement is published as soon as possible, in terms of the Listings Requirements;
- at any time, only one agent is appointed to effect any repurchase on the Company's behalf;
- the Company or its subsidiary does not repurchase securities during a prohibited period unless the Company has a repurchase programme in place where the dates and quantities of securities to be traded during the relevant period are fixed (not subject to any variation) and have been submitted to the JSE in writing prior to the commencement of the prohibited period and the Company will instruct an independent third party, which makes its investment decisions in relation to the Company's securities independently of, and uninfluenced by, the Company, prior to the commencement of the prohibited period to execute the repurchase programme submitted to the JSE;
- any general repurchase by the Company of its own ordinary shares shall not, in aggregate in any one financial year exceed 10% (ten percent) of the Company's issued ordinary shares as at the date of passing of this Special Resolution Number 3;
- in determining the price at which the ordinary shares are repurchased by the Company or its subsidiary in terms of this general authority, the maximum price at which such shares may be repurchased will not be greater than 10% (ten percent) above the weighted average of the market value for such ordinary shares for the five business days immediately preceding the date of repurchase of such shares; and

The directors of the Company confirm that no repurchase will be implemented in terms of this authority unless, after each such repurchase:

Statement of voting at Annual General Meeting

The AGM of the Company was held on 8 May 2018 and the requisite ordinary resolutions of a non-binding advisory nature endorsing the Policy and the remuneration implementation report were passed. The Policy resolution (resolution 6.1) was passed by a 74% majority, with 83.70% of the Company's shares being voted. The implementation report resolution (resolution 6.2) was passed by a 87.88% majority, with 83.68% of the Company shares being voted.

Subsequently, in 2018, the Company invited shareholders to engage on the Remuneration Report and the Company engaged with shareholders who responded. Changes were implemented in respect of its remuneration approach and Policy in order to respond ro shareholder concerns and align more fully to King IV and market practices. The Company commits to engage further with shareholders in respect of its Policy and approach should the need arise after the 2019 AGM.

Background statement

Remuneration philosophy, strategy and policy

Remuneration philosophy

The Company's guiding philosophy is to employ high-calibre, high-performing employees who subscribe to the values and culture of our Company. We recognise that our employees are integral to the achievement of our corporate objectives and they are accordingly remunerated for their contribution and the value they deliver.

Our Company is committed to fair, responsible and transparent remuneration across the business in respect of all employees on all levels. Both the fixed and variable elements of remuneration aim to support Company performance and value creation in the short, medium and long term, as well as to support the achievement of strategic objectives within the Company's risk appetite.

This policy is applicable to all employees of the Company.

Our remuneration strategy and policy are regularly reviewed by the Committee to ensure that they are appropriate and relevant in the support of sustainable business performance and in promoting an ethical culture and responsible corporate citizenship.

Remuneration strategy

Our remuneration strategy is designed to be aligned with our business strategy and the execution thereof to promote positive outcomes. Since we strive to attract, retain, motivate and reward employees for executing our business strategy, their remuneration must clearly be market-related and independent third parties are used by the Committee for the purpose of benchmarking to the appropriate segment. The general principle of our remuneration strategy is to structure executive and employee remuneration to include:

- a guaranteed annual package and benefits;
- an annual variable performance bonus; and
- ownership of shares through the long-term incentive scheme which is based on performance with the aim of creating a strong alignment to shareholder goals.

The remuneration strategy and policy are communicated to all employees during the year, together with our expectations around their contribution to the success of our organisation.

Remuneration policy

The key principles of the remuneration policy are that:

- the policies are governed by the Committee which regularly reviews them to ensure that they are relevant and support Company strategy;
- guaranteed remuneration is targeted at the median to lower quartile of the relevant market against which pay is benchmarked, in order to attract and retain high-calibre and high performing employees;
- it is Company policy that all employees are members of medical and retirement funds and have group life and disability cover;
- annual salary adjustments are governed by factors such as the consumer price index (CPI), retention strategies, the producer price index (PPI), industry performance, projected growth, contractual arrangements, affordability, and industry average increase surveys, which will be taken into consideration in setting the recommended increase. The Committee will approve or set the overall increase percentage that will be applied on a Company wide basis. Salary adjustments are at the discretion of the Board;
- variable pay is an important component of remuneration at Merafe and both annual and long term performance-based schemes which support our business strategy are in place;
- the short-term incentive scheme performance measures are assessed by the Committee and these measures are determined by taking into account corporate, individual, financial and non-financial criteria. The measures are applicable to the time period to which the scheme relates;
- the long-term incentive scheme measures are based on total shareholder return and a financial measure, appropriately weighted, as determined by the Committee from time to time, aligned to business requirements;
- executive remuneration is aligned to shareholder value creation through the long-term incentive scheme;
- where necessary, both short-term and long-term incentive schemes are benchmarked against the appropriate database by the Committee; and
- the over-riding principle governing payments for non-executive directors is that they will be made in the context of good governance and aligned to the relevant market.

Remuneration and Nomination Committee

Responsibility for the reward strategy rests with the Company's Board of Directors (“Board”) who in turn appoint the Committee. The Committee comprises at least three members, the majority of whom are independent non-executive directors and is governed by formal Terms of Reference.

The Terms of Reference *inter alia* clearly deal with matters such as (1) composition of the Committee; (2) roles and responsibilities; (3) delegated authority; (4) tenure and rotation of the Committee members; (5) reporting requirement and compliance; (6) access to information and resources; (7) meeting procedures to be followed; and (8) arrangements for the evaluation of the Committee's performance.

The primary role of the Committee is to ensure that the Company's directors and senior executives are fairly rewarded for their individual contributions to the Company's overall performance. The Committee also aims to ensure that remuneration is appropriate to attract, retain and motivate the right calibre of directors and senior executives, who will strive to achieve the overall goals of the Company. The Committee must demonstrate to all stakeholders that the remuneration of senior executives is set by a committee of Board members who:

- have no personal interest in the outcome of their decisions;
- give due regard to the interest of the shareholders and the financial and commercial health of the Company;
- take cognizance of market related remuneration, incentive bonuses and share incentive schemes as well as market trends; and
- play an active role in succession planning activities, notably for the Chief Executive Officer and executive management.

The Committee is responsible for making recommendations to the Board on remuneration policy for directors and, to the extent it deems necessary, makes comparisons between remuneration packages currently available to the Company's own executive directors and those available to directors of other companies of a similar size in the comparable industry. Comparisons are also made with other companies in South Africa and, if relevant, internationally.

The Committee also takes into account a number of principles, being *inter alia*:

- industry standards and comparisons with businesses in the same industry;
- expertise and qualifications of individuals;
- the risks associated with companies in the mining sector;
- the importance of the individual to the Company and his/her contribution;
- retention measures and motivation for the executive not to leave the Company;
- restraint of trade provisions; and
- nature of the position (role expectations, work load, etc.).

Remuneration policy

Statement of fair, responsible and transparent remuneration

The Board approves a policy that articulates and gives effect to its direction on fair, responsible and transparent remuneration.

The Policy for the remuneration of executive directors and other senior management is set taking appropriate account of remuneration and employment conditions of the industry, the Venture and the Company's specific circumstances.

Key principles

The Policy is governed by the Committee which regularly reviews the Policy to ensure that it is relevant and supports the Company strategy. To this end, guaranteed remuneration is targeted at the median to lower quartile of the relevant market data (against which we benchmark) to retain and attract high-calibre and high-performing executive directors and employees.

The Policy dictates that all full time employees are members of medical and retirement funds and have group life and disability cover.

Variable pay is an important component of the Policy and both annual and long-term performance-based schemes which support our business strategy are in place.

The short-term incentive scheme performance measures are assessed by the Committee and these measures are determined by taking into account corporate, individual, financial and non-financial criteria. The measures are applicable to the time period to which the scheme relates.

The long-term incentive scheme measures are based on Total Shareholder Return (TSR) and growth in headline earnings per share.

Executive director remuneration is aligned to shareholder value creation through the long-term scheme.

Where necessary, both short-term and long-term incentive schemes are benchmarked against the appropriate databases by the Committee.

Annual salary adjustments are governed by factors such as the consumer price index ("CPI"), retention strategies, the producer price index ("PPI"), industry performance, projected growth, contractual arrangements and affordability, and industry average increase surveys, which are taken into consideration in setting the recommended increase. The Committee will approve or set the overall increase percentage that will be applied on a company-wide basis. Salary adjustments are at the discretion of the Board.

Executive pay mix

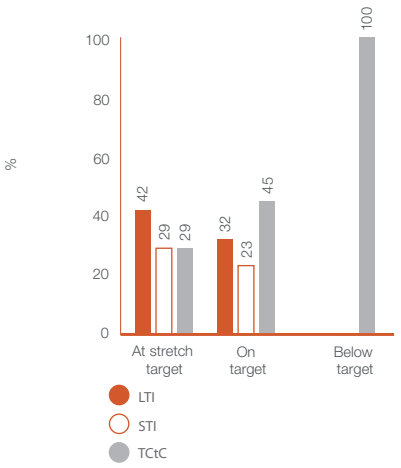

Executive pay mix is defined as the balance targeted between the major components of executive remuneration, namely:

- Guaranteed pay – based on Total Guaranteed Cost of Employment ("TCtC")
- Variable pay for performance
  - Short term incentives in the form of annual cash incentives ("STI"); and
  - The expected value from long term incentives ("LTI").

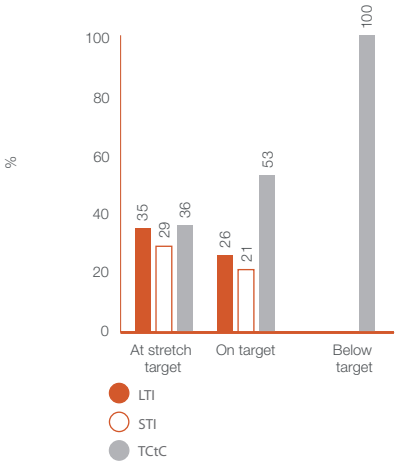

Note: Expected value is defined as the present value of the future reward outcome of an offer, given the targeted future performance of the Company and of its share price. It should not be confused with the term "fair value" which is used when establishing the accounting cost for reflection in a Company's financial statements. Neither should it be confused with the term "face value" which is used to define the current value of the underlying share at the time of an offer.

The Company's targeted pay mix aims to align the incentives of employees with the interests of shareholders. It is recognised that through acquisitions and business combinations over time, there will always be some deviation from the targeted pay mix structure across the Company. However the balance between TCtC, STI and LTI for executive directors are shown for illustrative purposes in the schematic below, at various performance levels.

Target reward mix for Chief Executive Officer

Target reward mix for Financial Director

Guaranteed pay

Merafe aims to establish and maintain an integrated pay line with pay levels that ensure that it is able to remain competitive, while managing costs.

Executive remuneration in respect of guaranteed pay is expressed in terms of TCtC.

An employee's TCtC consists of the following elements:

- Basic salary;
- Car and other cash allowances and/or perquisites;
- Employer contributions to the medical aid;
- Employer contributions to the retirement funding; and
- Employer contributions to risk benefits.

Salaries are reviewed annually and are targeted at the median to lower quartile of the relevant market. The Company conducts benchmarking exercises at least every second year against the top management reward surveys conducted by the large consultancies. The benchmark used is the median to lower quartile total guaranteed cost of employment for similar positions in similarly sized listed companies.

The Committee has regard principally to companies in the RSA market which are of similar size, complexity and scope to the Company. The Committee also takes into account business performance, salary practices prevailing for other employees in the Company and, when setting individual salaries, the individual's performance and experience in the role.

Appendix 3 (continued)

Remuneration report

Although salaries are reviewed annually, the Board reserves the right not to grant increases should circumstances so dictate. In addition, benefits offered are also reviewed on an annual basis to ensure that employees' needs are addressed fairly, schemes are cost effective, well governed and competitive.

Short term incentives

Merafe's annual incentives are aimed at rewarding a combination of both business and individual performance in order to support a company-wide performance culture. The bonus pool is determined as a percentage of Net Profit after Tax and the scheme is therefore self-funding. Financial and non-financial criteria as well as individual performance determine the bonus pool's distribution to individuals. Incentive awards are at the discretion of the Board after due consideration of Company and individual performance.

The Committee follows a less mechanistic approach in determining the bonus awards in order to reward outstanding performance more appropriately and to ensure that undue windfalls are mediated. As indicated above, the incentive scheme performance measures are assessed by the Committee and these measures are determined by taking into account the Company's financial and non-financial criteria as well as individual performance.

All STI awards are based on performance against inter alia, the following measures:

- Company measures: These include but are not limited to profitability, growth of business, cost management, sustainability and safety; and
- Individual measures: For the Chief Executive Officer and Financial Director, these include but are not limited to stakeholder engagement, talent management, leadership and reporting.

Targets are set by the Board on an annual basis as determined by Company strategy, business plan and operating conditions. Targets are set to ensure that performance is measured appropriately in accordance with a five-point rating scale. In addition, the Board will apply appropriate weights to measures in order to focus behaviour and performance, related to the strategic focus for the performance period.

Although measures and targets are determined at the start of the performance period, the Board may revise these measures and targets should prevailing business conditions indicate this to be necessary or in response to any other changes in the operating environment. All such changes, which represent the discretionary aspect of the policy, will be disclosed on an annual basis.

As indicated above, individual performance is primarily assessed from a predetermined criteria of key performance areas or value drivers. The selection of these is informed by the Company's business plan.

These metrics are assessed against a five point scale as follows:

Rating	Description	Definition
1	Poor	Indicates poor performance. All or most threshold targets not met.
2	Needs improvement	Performance against target is fair, however, performance against key measures is below threshold or target.
3	Satisfactory	Performance on target in respect of most or all measures.
4	Good	Performance exceeds target on most or all measures. Have reached stretched target on a number of key measures.
5	Outstanding/ excellent	Significant outperformance. All stretched targets met or exceeded.

The total STI pool available is capped at 3% of Net Profit after Tax. No bonuses are payable where the Net Profit after Tax in any financial year is less than R125 million. These parameters are revised by the Board on an annual basis for relevance and appropriateness.

In addition, the percentage for STI is capped for the various categories of employees as set out below:

Position	Maximum % of TCtC
Chief Executive Officer	100
Financial Director	80
Senior management	60
Management	50
Administrative staff	30

The total pool for incentives that become available for distribution will not be exceeded at any time.

STI potential is benchmarked between the median and 75th percentile of the relevant market, which is deemed appropriate when considered along with the guaranteed pay benchmarked at between the median and 25th percentile of the market.

The final incentive calculation is undertaken by aggregating the bonus claims of all participants and comparing this with the bonus pool derived from company performance.

Long term incentives

Background

The purpose of the share incentive scheme is to serve as an incentive and reward to employees of the Company and its subsidiaries for services rendered and to be rendered, aimed at promoting the continued growth of the Company by giving employees an opportunity to acquire shares in the Company and serve as a retention mechanism for employees whose services are regarded by the Company to be crucial to the future growth and sustainability of the Company's business.

The share incentive scheme further seeks to align employee interests with those of shareholders and to support a culture of ownership, with a focus on Company performance and sustainable growth.

Long term incentives, in the form of a share incentive scheme, have been in existence in the Company since 1999. The current share scheme was approved on 13 April 2010, under which both share options and share grants may be issued.

Eligibility and participation

All employees of the Company are eligible for share allocations in respect of the share incentive scheme rules, subject to Board approval and the prevailing implementation policy.

Shares to be allocated

Under the rules of the share incentive plan, the following shares may be offered:

- Share options which will be granted at the offer price
- Share grants being full value shares.

Vesting rules and settlement

Generally share options vest one third per year on the 3rd, 4th and 5th anniversaries and are settled by physical delivery of shares against receipt of payment of the option price. The options lapse after seven (7) years if not exercised, while employed within the group.

Share grants are granted by the Board on the recommendation of the Committee. They vest one third per year on the 3rd, 4th and 5th anniversaries and are settled by physical delivery of shares. Alternatively, the Company has the right to settle in cash the value of shares granted.

Equity settlement will take the form of repurchasing of shares on the open market for the benefit of the employee whose shares have vested. The Company reserves the right to issue new shares for purposes of settlement.

Participation and termination rules

In the event of an employee leaving the Group for a reason approved by the directors, such as retirement or disability, all shares granted will vest. All approved terminations will be disclosed on an annual basis.

In the event of either a no fault termination or an employee's death, shares granted will vest within three months. In addition, in the event of retirement at the earliest date allowed by the retirement fund, all share grants shall vest.

In the event of either a no fault termination or an employee's death, the employee or his/her estate has 12 and 24 months respectively to exercise share options granted to that employee. In the event of retirement at the earliest date allowed by the retirement fund, the employee will have one year to exercise their share options allocated.

In the event of voluntary termination (i.e resignation) or a fault termination, (i.e. those that leave as a result of resignation, dismissal or poor performance), any right to any shares and all allocations will lapse immediately upon termination. No further claims may be laid to such lapsed shares, whether full value or shares options.

In the event of a change in contract of employment, e.g. lateral moves or promotions, the participant will remain entitled to previous share allocations, subject to vesting periods, vesting schedules and prevailing performance conditions and criteria as set out during the initial share allocation.

In the event of a reconstruction or takeover, share allocations will vest on a pro-rata basis subject to the Committee evaluating the applicable performance conditions and determining the number of shares per participant.

Performance vs retention shares

During 2013 a decision was made by the Committee to vary the balance between performance and retention oriented grants or options and also to simplify the performance criteria that determine vesting of the performance grants.

The balance between performance oriented share grants and the retention oriented share grants for the CEO was weighted 70% in favour of the performance oriented share grants.

For executive directors and senior managers these percentages were (respectively) 60% and 50%. All other participants received only retention oriented share grants.

In response to shareholder requirements for more share grants to be subject to performance conditions as opposed to retention shares, the allocation policy was revised in 2018 as follows:

Revised LTI allocation policy

	Merafe LTI offer policy current		
	LTI (expected value) % of TCtC	Targeted offer value % of TCtC	Balance performance/ retention
Chief Executive Officer	70	50	70/30
Financial Director	50	35	60/40
Senior management	40	30	50/50
Management	30	25	0/100
Administration	20	15	0/100

	Merafe LTI offer policy proposed		
	LTI (expected value) % of TCtC	Targeted offer value % of TCtC	Balance performance/ retention
Chief Executive Officer	70	60	100/0
Financial Director	50	45	100/0
Senior management	40	40	100/0
Management	30	35	100/0
Administration	20	25	100/0

All future share allocations will be performance based. In order to balance back to the reward mix and expected outcomes, the targeted value of the share allocation as a percentage of TCtC was increased as per the table above.

Performance criteria

The performance criteria for all existing performance oriented share grants will remain in place, but future grants will be governed by two metrics: (1) Comparison of Merafe's TSR over a three year period with that of a selection of JSE listed, small cap mining and resources companies, and (2) Growth in Headline Earnings per share (CPI + a specified percentage as determined by the Board) over a three year period. The two measures will weigh 50/50 or as determined by the Board from time to time. Measures will be applied per performance share allocation and will remain in force for the duration of the performance period. Performance measures and targets are approved for and applicable to a specific performance period. No retesting of performance conditions is allowed.

The Committee will assess performance against target once the applicable performance period is completed and approve the vesting of performance shares to the extent that targets are met.

Performance measure I: Total Shareholder Return

The comparator group for Total Shareholder Return ("TSR") is made up as follows:

TSR Comparator Group

Company	Ticker
Royal Bafokeng Platinum Ltd	RBP
Harmony Gold Mining Ltd	HAR
Lonmin plc	LON
Hulamin	HLM
Pan African Resources plc	PAN
Merafe Resources Ltd	MRF
Tharisa plc	THA
MC Mining Ltd	MCZ
DRDGOLD Ltd	DRD
Eastern Platinum Ltd	EPS
Wesizwe Platinum Ltd	WEZ
ArcelorMittal Ltd	ACL

Assuming that a group of 12 (11 + Merafe) companies are adopted as the comparator group of companies, vesting of the performance based share grants will be in accordance with the following policy:

- 50% of performance shares allocated will be subject to performance against the TSR measure;
- If Merafe's TSR over the three year period places it in one of the top four positions, then the full number of performance granted shares subject to this measure will vest in equal proportions on the 3rd, 4th, and 5th anniversaries of their grant;
- If Merafe's performance over the three year period places it in 5th position, then two thirds of the number of performance granted shares will vest in equal proportions on the 3rd, 4th, and 5th anniversaries of their grant;
- If Merafe's TSR over the three year period places it in 6th position, then one third of the number of performance granted shares will vest in equal proportions on the 3rd, 4th, and 5th anniversaries of their grant; and
- If Merafe's TSR over the three year period places it below 6th position, then none of the performance shares will vest.

The table below provides details of the revised vesting schedule for performance shares subject to the TSR measure:

Performance measure II: Growth in Headline Earnings per share (HEPS)
Assuming that the performance targets below are set by the Board as illustrated in the table below, vesting of the performance based share grants will be in accordance with the following policy:

- 50% of performance shares allocated will be subject to performance against the growth in HEPS measure;
- If performance meets or exceeds target, i.e. CPI + 2% over the performance period, 100% of shares will vest;
- If performance is at threshold, i.e. CPI + 1% over the performance period, 50% of shares subject to this measure will vest;
- For performance below threshold, 0% of shares subject to this measure, will vest; and
- Linear vesting will take place between different performance milestones.

HEPS target	Vesting quantity % of allocation* Proposed
On target CPI + 2%	100%

LTI offer policy

The following principles will govern the LTI offer policy:

- Share options will only be given at the discretion of the Board as and when circumstances dictate and only to executive management that have direct line of sight in terms of Company performance;
- Full value shares, with performance conditions, will be granted to all employees on an annual basis subject to ongoing satisfactory individual performance, the expected value of which will be in accordance with the Company's reward strategy – pay mix;
- Full value shares may be offered to new appointees as an attraction measure, the value of which will be determined and approved by the Committee, and will be subject to a minimum of three years vesting period;
- Share grants will be in favour of performance based shares, with all shares granted subject to performance measures over a three year period;
- Share grants will be offered to employees with only performance and no retention shares;
- The value of the share grant will be calculated as a percentage of the current TCtC guaranteed package;
- No offer shall be made which together with any other scheme shares would exceed 5% of total issued share capital of the Company;
- The maximum aggregate number of shares granted or options allocated to a single participant, shall be limited to 1% of the total issued share capital of the Company;
- Prior to vesting, no participant will qualify to receive any dividends declared;
- The Company will communicate to participants, at least on an annual basis, in terms of shares granted, vesting and/or any changes in rules or conditions of participation; and
- All share grants and options will be disclosed over its lifetime in the annual Remuneration Report.

Contracts of employment

Senior and executive management are subject to the Company's standard terms and conditions of employment where notice periods are between three and six months. In line with the recommendations set out in the King reports, Company policy prevents any senior or executive manager from being compensated for loss of office.

None of the senior or executive management have extended employment contracts or special termination benefits or balloon payments.

In the event of a change of control of the Company (as defined in the Companies Act) where the Company no longer requires an executive to fulfil their specific role post the change of control, the Company shall pay to the executive 12 months remuneration on the last day of the notice period and after completion of handover of duties.

Retention measures

The Committee reserves the right to apply retention measures should circumstances indicate. Retention measures may include cash or equity awards and will be appropriately disclosed on an annual basis.

Clawbacks

Any remuneration previously paid to executive directors, that is subsequently found to have been as a result of criminal or otherwise illegal activities, must be repaid to the Company.

In the event of restatement of the Company's results (other than a restatement caused by a change in accounting policy, standards or interpretation) which results in lower performance-based remuneration had it been calculated on the restated results, the Committee shall review such performance-based remuneration, determine the amount to be recovered from the executive and take steps to recover the amount.

Non-executive directors' fees

The remuneration of non-executive directors is provided in the context of good governance, and is primarily based upon a methodology which takes into account expertise, contribution by the director and attendance. Standard duties of non-executive directors include preparation for and attendance at Board meetings, AGMs and results presentations. If required, the directors may be requested to perform work outside of their standard duties and for this they will be remunerated based upon the time spent and their level of expertise. Independent benchmark advice is sought as to levels of remuneration for non-executive directors and the policy is that non-executive directors will be remunerated at the median to lower quartile of listed companies of similar size, in order to ensure that appropriately qualified and experienced directors are appointed. Non-executive directors' fees will be tabled for approval by the shareholders of the Company on an annual basis. The fees paid to different roles such as chairman may vary from the fees paid to other non-executive directors. The remuneration of non-executive directors will be split between 40% in relation to fees for attendance at meetings and 60% in relation to fees for retention. Attendance at meetings will include scheduled Board meetings and special Board meetings. Retention fees will include inter alia attendance at site visits, round robin resolutions/decisions and strategy sessions.

Non-executive directors do not participate in any share-based incentive scheme or any other incentive scheme that the Company may implement to avoid any potential conflict of interest.

Review

This policy was approved by the Company in March 2019 and will be reviewed annually against current legislation and practice for approval by shareholders during the Annual General Meeting.

The performance conditions relating to share awards made prior to 2013 are capacity growth, assets under management, JSE SRI Index, JSE Small Capitalisation Index and Mining Index. The performance conditions relating to share awards made post 2013 is a single performance metric that requires Merafe's TSR to be in a position amongst a group of companies over a three-year period.

Share grant allocations were implemented based on the VWAP of the previous day's trading as follows:
